## SENIOR IT SUPPORT & IDENTITY MANAGEMENT PROFESSIONAL

I am a Dynamic IT professional with 15+ years of experience implementing, managing, and supporting enterprise IT systems with a focus on identity management, Microsoft 365 services, and cloud infrastructure. Proven track record of leading technical implementations, providing escalation support, and managing user access across multiple platforms. Adept at developing IT processes, maintaining compliance with security standards, and delivering exceptional end-user experiences in high-pressure environments.

### CORE COMPETENCIES

- **Identity & Access Management:** User authentication, permission management, RBAC implementation, IAM best practices
- **Microsoft 365 Administration:** Exchange Online, SharePoint, Azure, Active Directory, Intune, Teams, Entra
- **IT Service Management:** ITIL framework, ServiceNow, Jira, change management, incident response
- **Technical Support:** Remote troubleshooting, hardware/software diagnostics, system optimization
- **Compliance & Security:** ISO 27001 controls, PCI-DSS requirements, security best practices
- **Cloud Technologies:** AWS (EC2, S3, CloudFormation, VPC), Azure services, cloud security
- **Technical Documentation:** Process documentation, user guides, technical manuals

### TECHNICAL PROFICIENCIES

- **Operating Systems:** Microsoft Windows, Windows Server OS, macOS, Linux, Cisco IOS
- **Management Tools:** Microsoft 365 Admin Center, Microsoft System Center Configuration Manager (SCCM), Active Directory, Azure AD, Microsoft Exchange, Intune, SharePoint administration, ServiceNow, Jira
- **Security Tools:** CyberArk, Qualys Vulnerability Management, Dome 9, Checkpoint Cloud Security
- **Networking:** LAN/WAN, VPN, DNS, DHCP, TCP/IP, Cisco networking, Polycom management
- **Applications:** Microsoft Office Suite, Microsoft Teams, SharePoint, Python, SQL

**PROFESSIONAL EXPERIENCE**

**AML Senior Analyst** **AML RightSource | 2026 – Present**

- Tailor compliance programs to address risks specific to vehicle financing and leasing while guiding business partners on regulatory expectations.
- Conduct ongoing enterprise-wide AML/CTF risk assessments to identify vulnerabilities across products, customers, and geographies.Oversee robust CDD/KYC processes, including customer risk profiling, beneficial ownership verification, and identification of PEPs.
- Monitor customer transactions and activities to identify suspicious patterns or behaviors that may indicate financial crime risks.Submit suspicious transaction reports (STRs) and other required regulatory filings to FINTRAC, ensuring full compliance with record-keeping obligations.

**MS365 Implementor & Trainer** **TDW Technologies | 2020 – Present**

- Implement and manage Microsoft 365 services including Exchange Online, SharePoint, and Azure AD for 15+ organizations, achieving 99.9% system uptime
- Configure and administer user identities and access management across Microsoft platforms, implementing role-based access control models
- Integrate on-premises Active Directory with Azure AD, ensuring seamless user authentication and single sign-on capabilities
- Design and implement security policies in compliance with industry standards, reducing security vulnerabilities by 40%
- Create comprehensive documentation for system configurations and user processes, improving knowledge transfer
- Train end-users and IT staff on Microsoft 365 applications and security best practices, increasing adoption rates by 30%
- Design IT processes for user provisioning/deprovisioning, reducing security risks and ensuring proper access management
- Provide escalation support for complex technical issues, maintaining a 98% user satisfaction rate

**Cloud Analyst** **TDW Technologies | 2019 – Present**

- Design, implement, and maintain cloud security policies and access management systems for 20+ clients
- Configure and manage AWS IAM policies, ensuring proper authentication and authorization across cloud environments
- Conduct vulnerability assessments and implement remediation strategies, reducing security risks by 40%

- Integrate cloud services with identity management systems, enabling secure and efficient user access
- Provide technical consultation to stakeholders on security best practices and compliance requirements
- Implement and manage security controls in alignment with ISO 27001 and PCI-DSS standards
- Analyze system vulnerabilities and implement security hardening measures to protect sensitive data
- Document and maintain cloud architecture diagrams and security configurations

**Cybersecurity Instructor** **Willis College (Canadian Armed Forces) | 2023 – 2024**

- Trained 60+ Canadian Armed Forces personnel on cybersecurity concepts including identity management and access control
- Developed curriculum on information security concepts, governance frameworks, and regulatory compliance
- Created and delivered hands-on labs covering user authentication, permission management, and security monitoring
- Designed practical exercises on secure network configurations and access control implementation
- Incorporated real-world security scenarios into training materials, improving practical application skills
- Maintained up-to-date knowledge of cybersecurity trends and evolving threats, ensuring relevant instruction

**Information Technology / Security Instructor (Part-time)** **St. Clair College | 2021 – 2023**

- Instructed students on Microsoft Server technologies, Active Directory management, and security implementation
- Taught courses on governance, risk management, and compliance frameworks including ISO 27001
- Developed curriculum on identity management concepts and access control best practices
- Created lab exercises demonstrating user account management, permission structures, and security auditing
- Provided guidance on implementing security controls for regulatory compliance
- Maintained high student engagement with practical, industry-relevant instruction

**IT Consultant – Skype for Business/MS Teams** **Rogers Communication | 2019**

- Configured user authentication and access management for Skype for Business and Microsoft Teams platforms
- Implemented secure user provisioning processes, ensuring appropriate access rights across 5,000+ user accounts
- Designed and documented standard operating procedures for account management and user permissions
- Collaborated with security teams to ensure compliance with corporate security policies
- Configured and administered Exchange Online unified messaging for various user account levels
- Trained support staff on troubleshooting authentication and access issues, improving first-call resolution rates
- Achieved 99.99% system uptime for critical communication services while maintaining security standards

**Skype Voice Migration/Operations Support** **WSP Canada | 2015 – 2018**

- Managed user identities and access permissions during migration of 8,000+ users to Skype for Business
- Configured secure authentication methods for Skype for Business integration with existing systems
- Implemented role-based access controls for administrative functions and user capabilities
- Created and documented user provisioning and deprovisioning workflows
- Set up and managed unified messaging in Exchange Server, ensuring proper access controls
- Provided technical escalation support for complex authentication and access issues
- Maintained system security while enabling seamless communication services across the organization

**Regional CSS Analyst / Regional Deskside Support** **WSP Canada | 2015 – 2019**

- Managed Active Directory user accounts and group policies, ensuring appropriate access rights
- Coordinated Windows PC deployment via SCCM with proper security configurations and user permissions
- Provided Tier 2 technical support for hardware, software, and network connectivity issues
- Responded to security incidents, including virus infections, implementing immediate remediation
- Supported Office 365 applications and managed deployments through admin center
- Documented technical solutions and maintained knowledge base for common support issues

- Implemented and enforced IT security policies while providing responsive user support

**EDUCATION & CERTIFICATIONS**

**Bachelor of Engineering (B.ENG.)**, Information and Communication Technology Covenant University, Ota, Nigeria
**Information Technology Professional 2-Year Certificate**, Dean's List Lambton College of Applied Arts & Technology, Sarnia, Ontario
**Advanced Diploma**, Telecoms & Networking Telecoms Training Center, Nigeria
**Critical Infrastructure Protection Cyber Security Professional / Vulnerability Management** OPSWAT Academy - September 2022
**Vulnerability Management** Qualys Certification and Training Center

**Technical Certifications:**

- AWS Certified Cloud Practitioner
- Microsoft Specialist: Server Virtualization with Windows Server Hyper-V and System Center
- Microsoft Certified Professional (MCP)
- Cisco Certified Entry Networking Technician (CCENT)
- CompTIA Project+
- CompTIA A+
- Azure (AZ-900) - In Progress
- AWS Certified Solutions Architect Associate - In Progress
- AWS Certified Security – Specialty - In Progress
- CISSP Certification - In Progress

**PROFESSIONAL DEVELOPMENT**

- PowerShell for Windows Server Administration
- Network Troubleshooting
- Cloud Computing: IT Pro to Microsoft Cloud Pro
- Azure Administration: Manage Identities
- ITIL Framework Fundamentals
- Identity and Access Management Best Practices
